Main 5 Pin White Harness:

1. Red / White Wire: Parking Light Relay Power Input
2. White Wire: Parking Light Relay Output
3. Black Wire: Ground to Vehicle FRAME
4. Brown Wire: Positive output To Siren
5. Red Wire: +12V To Constant Battery Source

6 Pin Mini Connector Wire Harness:

1. Violet Wire: Positive Door Pin Switch Input
2. Blue Wire: Instant Trigger Ground Input
3. Green Wire: Negative Door Pin Switch Input
4. Pink Wire: To Ignition Switched + 12V
5. Orange Wire: 200mA Grounded when armed
6. Tan Wire: (-) 200mA Programmable Output

A. Programming Transmitter:

Note: This mode will only retain the last 4 remote transmitters programmed. If the transmitter memory is exceeded, the security system will start deleting transmitters from memory in chronological order.
1. Turn the Ignition 'switch 'OFF/ON' 3 TIMES and stay in ON position. Within 15 seconds.
2. Push the Valet switch 3 times and holding in on 3rd push until a long chirp is hearing then release the valet switch. You are now in the Transmitter programming mode.
3. Press and hold any button of the transmitter until the siren responds with a confirming chirp, indicating the signal has been stored into memory.
4. If you have additional transmitters (up to 4) that need to be programmed, repeat step 3 for each transmitter.
Exit: Turn Ignition to ‘OFF’ position, or leave it for 15 seconds. Three long chirps & Three parking light flashes to confirm exit.

B. ALARM FEATURES PROGRAMMING:

ALARM FEATURE “I” PROGRAMMING:
1. Turn the Ignition ‘switch’ ‘ON/OFF’ 3 TIMES and stay in OFF position.
2. Push the Valet switch 2 times and holding in on 2nd push until one chirp with a long chirp is hearing then release the valet switch. You are now in the Alarm feature ‘I’ programming mode.
3. Press and release the transmitter button ‘A’ corresponding to the feature ‘A’ you want to change.
   a. The siren chirps and LED pause will indicate newly setting.
4. Depress the transmitter button ‘A’ again to change the feature again. Simple keep re-depressing the transmitter button ‘A’ again until the module advances to your desired setting.
5. Depress the transmitter button ‘B’ corresponding to the feature ‘B’ you want to program.

Exit: Turn Ignition to ‘ON’ position, or leave it for 15 seconds. Three long chirps to confirm exit.

Adjust and Test the sensitivity level of the Shock Sensor
1. Turn the Ignition ‘switch’ ‘ON/OFF’ 3 TIMES and stay in OFF position.
2. Push the Valet switch 6 times and holding in on the 6th push until three chirps with a long chirp is hearing then release the valet switch. You are now in the Alarm feature ‘Shock Sensor’ programming mode.
3. Press and hold 🌄 button for 2 seconds. one long siren chirp to indicates the unit is ready to accept adjustments of the shock sensor.
4. Press 🌄 button on the transmitter once will decrease sensitivity level by one, each time an decrease is made the siren horn will respond with [1] chirp, while 2 chirp indicates the minimum of sensitivity.
5. Press 🌄 button on the transmitter once will increase sensitivity level by one, each time an increase is made the siren/horn chirp will respond with [1] chirp, while 2 chirp indicates the maximum of sensitivity.
6. Hit the bumper or strong metal part of the motorcycle to test the threshold level of the sensor.
   a). Activate the warn-away (first stage the shock sensor), the siren will emit a short chirp.
   b). Activate the full alarm (second stage the shock sensor), the siren will emit a long chirp.
7. When you are satisfied with the setting, press and buttons at the same time to lock in the
   adjustment.
   Note: If 20 seconds of inactivity expire, or turn on the ignition during of above steps, the unit will exit the
   program mode and return to the disarmed mode. Three long chirps to confirm exit.

ACTIVE ARMING – LOCK & ARM:

1. Press button on transmitter.
2. The siren will chirp once and parking light will flash once indicating that the system is now armed. The vehicle doors will lock upon arming when interfaced with the security system.
Ajar Warning: If the siren sounds 3 chirps, then you have left a door, trunk, or hood lid ajar.

Silent Arming / Disarming: Press the and buttons at same time will arm or disarm your security system, No chirp sound will be heard, arm / disarm confirmation will be through the vehicles parking lights only.

Shock Sensor By-Pass: Press the button twice within 3 seconds will arm the security system, by-pass the shock sensor. The system will chirp one additional time to confirm the sensor bypass mode was activated. The sensor bypass feature is programmed to activate for one arming cycle only. The security system will return to normal operation during the next arming cycle.

PASSIVE ARMING:

Active arming / disarming is controlling your security system via the remote transmitter. This security system is equipped with an optional Passive Arming feature, which allows the security system to arm 30 seconds after the last door is closed. Operation is as follows.
1. Turn the ignition to the “OFF” position and exit the vehicle.
2. After all entrances are closed, the security system LED will flash fast for 30 seconds. If you reopen any door / hood / trunk, the security system LED will stop flashing. It will begin flashing again once the vehicle all entrances are closed.
3. After 30-second timer has elapsed, the security system will automatically “ARM”. The siren will chirp [1] time and the parking lights will flash [1] time.

PASSIVE DOOR LOCKING:

The vehicle doors will automatically lock after passive arming cycle has been completed.

ACTIVE DISARMING – UNLOCK & DISARM:
1. Press button on the transmitter.
2. The siren will chirp twice and parking light will flash twice to indicating that the security system is now disarmed. The vehicle doors will unlock disarming when interfaced with the security system.

Tamper Disarm: If alarm triggered, upon disarm the system, siren chirp 4 times, parking light flash 3 times.

Two Step Door Unlock: This feature will independently unlock the driver door only when disarming the security system. Pushing the button on the transmitter a second time within 3 seconds will unlock the entire vehicle.

Automatic Re-Arm: If this feature is selected, the security system will automatically re-arm itself 60 seconds after disarming with remote transmitter. Automatic rearm will cancel if any door is opened before the 60 seconds timer has elapsed.

DISARMING WITHOUT A TRANSMITTER
The Override function may be used if the remote transmitter is lost or inoperative.
1. Enter the vehicle and turn the ignition switch to ‘ON’ position. (Alarm will sound.)
2. Within 10 seconds press and release the valet switch
The alarm will stop sounding and enter the disarm mode. You can now start and operate the vehicle normally.

VALET MODE:
The valet switch allows you to temporarily bypass all alarm function, eliminating the need to hand your transmitter to parking attendants or garage mechanics. When the system is in valet mode, all alarm function is bypassed, however the remote panic feature and remote door locks will remain operational.

Enter Valet Mode: 1. Turn the ignition to “ON” position.
2. Push and hold valet switch for 2 seconds until the LED turns on. The LED will remain on as long as the system is in ‘valet mode’.

Exit Valet Mode: 1. Return to normal operation, turn ignition ‘ON’.
2. Push and hold valet switch for 2 seconds, The LED will turn off indicate the system are exiting the valet mode.

PANIC FUNCTION:
The transmitter can be used as a remote panic switch to manually trigger the alarm in case emergency.
1. Press and hold button on the transmitter for 3 seconds. The alarm will immediately sound.
2. To stop the alarming press and hold button on the transmitter for 3 seconds.
3. If the button is not pressed, the alarm will automatically stop after 30 seconds.

TRIGGER THE SYSTEM
When armed, your vehicle is protected as follows:
1. Light impacts will trigger the warn-away signal. A long chirp from siren/horn.
2. Heavy impacts / Doors open / Hood open / Trunk open / Turns on the ignition switch will trigger the programmed sequence.

The starter disable relay (if installed) prevents the vehicle’s starter from cranking. The siren and parking lights will turn on to alerting of an intrusion for 30 seconds. Then it will stop and automatic reset and re-arm. If the one of sensors or detectors still active, the alarm system will sound a maximum of 6 times of 30 seconds cycles.

ANTI CAR - JACKING
Warning: If you don't need the car jacking function in this alarm system, be sure to set car jacking feature “OFF”. This system is default setting car jacking “OFF”.

Active Anti Car Jacking:
1. Upon ignition is “On”, press and hold and buttons at the same time for 2 seconds. The parking lights will turn on for 1.5 seconds to indicate the system enters the car-jacking mode.
2. Once the system in car-jacking mode, If you are forced from the vehicle, the system will be trigger when the door is opened and closed while the ignition is “ON”.

Trigger The Car Jack Mode:
a). 50 seconds after the system has been triggered. The siren will start chirping for 15 seconds.
b). During this 15 seconds period of chirping, you will be alerting to push the valet switch once to turn off the car-jacking feature. If not, it will enter second timer car jacking.
c). 65 seconds after the system has beer triggered. The siren starts alarming and the parking light starts flashing.
d). 90 seconds after the system has beer triggered
   1. The siren still alarming and the parking light flashing, and
   2. The starter disable will activate to prevent the vehicle from starting.
   3. It will remain active until the vehicle's battery power exhausted.

Override The System To Turn Off Car Jacking: Turn the ignition switch from OFF to ON, and within 10 seconds push valet switch, the siren will stop and the system disarmed

CAR LOCATOR:
Upon armed, press button on the transmitter to active car locator function. The siren will chirp 6 times. The parking light will flash 12 times, for you to easily locate your car.
